COVER LETTER

Date: November 27, 2025

Dear Hiring Manager,

I am currently completing my 12-month internship as a Full-Stack Developer Intern, aligned with my studies at Informatics Institute of Technology (IIT). By December 4th, I will have finished the first six months, and I am now looking for a company where I can complete the remaining six months under proper supervision, guidance, and structured code reviews.

During my internship at Management Systems (Pvt) Ltd, I have built enterprise-level modules and user portals for fund details, loan data, and insurance workflows using .NET 8, Next.js, TypeScript, Oracle 11g, and Tailwind. I have also implemented Kafka and SignalR to enable real-time, event-driven communication across multiple system modules.

In addition to development work, I have strong documentation skills. I have created flow diagrams, activity diagrams, sequence diagrams, user personas, and user journeys, based on interviews and real user feedback. Clear documentation has been a key part of how I communicate requirements and design decisions with the team.

I am also highly comfortable working with AI tools such as ChatGPT (paid), Claude, and Gemini, which I use daily to debug, design, explore alternatives, and accelerate development while maintaining quality.

If given the opportunity, I would be happy to complete my remaining internship period with your team, and if my performance meets your expectations, I would be very willing to continue as a permanent employee afterward.

Thank you for your time and consideration. I would greatly appreciate the opportunity to contribute and grow within your organization.

Yours faithfully,
Isandith Perera
